## Part 2 - Relative vs Absolute path:

### *Absolute path:*

Absolute path is when you are referring to file location from beginning of partition, in Windows it always starts with drive letter.

We are in `c:\Users\student` and we want to go to `c:\Users\student\Desktop`

`cd c:\Users\student\Desktop`

```

Example of relative path:

We know that in parent folder we have Desktop folder, using relative path we can change our location using command:

```
cd ../Desktop
```

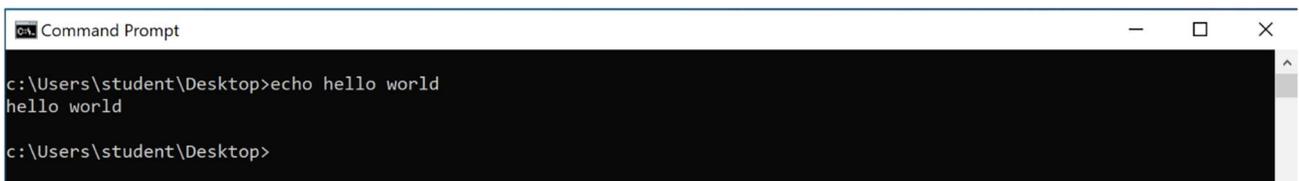

```
Command Prompt
c:\Users\student\Pictures>cd ../Desktop
c:\Users\student\Desktop>
```

- 1) Open CMD
- 2) Move to Users folder using absolute path
- 3) List content of Pictures folder using relative path
